

Proactive Senior Health Service

Assess - Intervene - Refer/service

Depression is not a "natural" consequence of growing older, even when facing health challenges or loss.

However as many as up to 49% of seniors in assisted living settings experience mental health challenges.

Proven Effective Care Encounters For Seniors

The AIRs is personalized to seniors. No reading, no typing; just easy interview interfaces with real medical providers who guide care. Each participant is engaged with an onsite provider and is guaranteed a private, safe, engaging and efficacious experience.

Convenient Assessment Schedule

The AIRs Assessment averages only 30 minutes and will serve groups simultaneously. AIRs' expert Providers will discreetly identify, social determinants of health, memory challenges, anxiety, depression, suicidal ideation, substance abuse, safety and general concerns.

Same Day Face-to-Face Interventions and Referrals

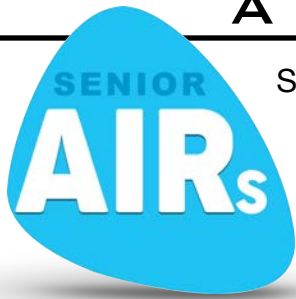

For individuals indicating need, a direct intervention with a Provider will be arranged the same day. Interventions may lead to care and or strategies for managing concerns. If beneficial, a same day referral to ongoing care with Althing Clinic or another health service of their choice will be arranged.

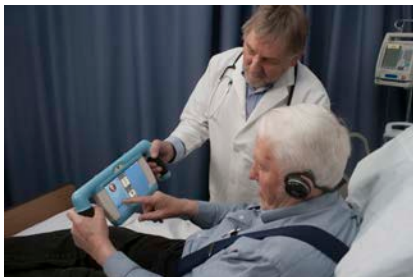

Beyond the Encounter

AIRs platform can remain onsite for seniors to continue prescribed care, to check in with concerns or simply to use as a comfortable and simple way to visit with remote family and friends.

A LEADING CLINIC SERVICE

Senior AIRs is provided by Althing Clinic, a leading provider of proactive care services. This critical proactive service finds and addresses mental health and general health challenges and is reimbursed by Medicare ensuring a cost effective value. It is easy to apply, qualified, and achieves meaningful in results.

Group Triage to Personal Service

The AIRs group Assessment provides agency and privacy for participants that is proven to achieve more openness and interaction. Those who indicate need are then provided a face-to-face Intervention with a care expert who guides them in developing a care plan or referral. The resulting de-identified data is then provided to the facility as a significant value.

AIRs is a Product & Service of
